

Summit Construction Company LLC

A multi-service construction firm

BUILDING VISIONS INTO REALITY

An Equal Opportunity Employer

To Whom It May Concern:

I have had the pleasure of working with Four Seasons Environmental for the past several years working together on multiple K-12 school construction projects including both Coshocton and Lancaster Districts. Chris Rice and his team are extremely knowledgeable on all facets of the commissioning process. They are a team-oriented group that communicates extremely well during both the design and construction phases of the project attending both Owner and Contractor meetings to ensure the installation of mechanical, electrical, plumbing, and envelope systems are being installed per the project documents. With the help of Four Seasons, Lancaster Tallmadge Elementary was completed three months ahead of schedule at no additional cost to the Owner with all systems functioning properly when the Owner occupied the building. It is without hesitation that I would recommend Four Seasons Environmental for all your commissioning needs and services. If you have any additional questions, please do not hesitate to contact me.

Sincerely,

Andy Rogers, LEED AP
