To Whom It May Concern,

As the maintenance supervisor for Bloom-Vernon Local School District, I am responsible for the operation and maintenance of two school buildings, encompassing hundreds of different assets. This can be an extremely complex and challenging job; however, through use of Maintenance Plan and Maintenance Track software provided by Four Seasons, I am able to ensure all equipment maintenance is scheduled and completed in a timely manner.

Four Seasons has ensured that Maintenance Track is a user-friendly software that allows me to print preventive maintenance schedules for each month, helping my department to stay on track. Additionally, I am able to log historical information for any asset. This allows me keep track of repair costs, time spent on maintenance, replacement parts and even the suppliers I order parts and materials from.

Through these features and many others, FSE's Maintenance Track has allowed not only me to be more efficient, but our entire district. After nearly nine years of solid use, I can honestly say that I am extremely pleased with the Maintenance Track software and would recommend it to any facilities department.

Very sincerely,

A handwritten signature in cursive script that reads "Gary Lee".
