

DAYTON
METRO
LIBRARY

To Whom It May Concern:

It is my pleasure to strongly recommend Four Seasons Environmental, Inc. of Dayton, Ohio particularly, Chris Rice, their Facilities Group Manager.

My name is Gerry Mitchell, a Facilities Construction Consultant for the Dayton Metro Library. I am a registered Architect in the State of Ohio with over 35 years of experience, currently overseeing design and construction of 16 branches in the Dayton area.

Four Seasons has rendered their services for our 225K sf / \$49M Main Library construction in downtown Dayton. Their skillsets and highly qualified personnel delivered the expertise and oversight of all Enhanced Commissioning inspections performed to ensure contract and design compliance for all systems in our LEED Gold achievement completed project.

All of their 'Team' members demonstrated the highest degree of professionalism and exhibited superior qualification and knowledge in all aspects of construction. This was especially evident documenting complicated Elec / Controls / HVAC issues for our smoke control 'Evac' systems.

I highly recommend this company for your projects' needs. If anyone needs more information or specific examples, please contact me.

Sincerely,

Gerry B. Mitchell, R.A.
