February 27, 2012

Mr. Reed Tarkington
Four Seasons Environmental
43 New Garver Road
Monroe, Ohio 45050-1243

Dear Reed:

As you know Chris Rice was assigned by your firm to be our commissioning agent for our Middle School Project.

When Chris first came on site, I believe there was some skepticism from some of the construction people about his abilities.

From the beginning I also, found him to be a little pushy on some issues, but I later learned this to be a good thing. Chris has always been straight forward with his approach to the issues at hand and I've found him to be right on the mark as far as his reasoning for the work at hand. Without doubt he has kept the well being of this school district at the top of the priority and is to be commended for that.

We are now beginning to wind this project down and I wanted to let you know that as far as I'm concerned Chris has done an excellent job and has always kept me in the loop of what is going on and what he thinks is to our best interest.

In closing, I hope the district and Four Seasons can continue the relationship we've had over the past several years. As I enter retirement, I will probably still be somewhat involved in the maintenance programing as well as some special projects.

Please me know if there's anything I can do for you and your company, and please let Chris me of my appreciation for what he has done.

Sincerely

Darrell R. Cook, building/grounds coordinator
